Alexandria

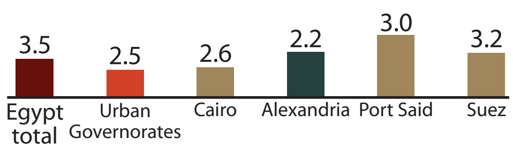

2014 Egypt DHS
Demographic and Health Survey

	Alexandria	Urban Governorates	Egypt total
Fertility and Family Planning			
Total fertility rate (number of births per woman)	2.2	2.5	3.5
Current use of *any* method of family planning (% of currently married women age 15-49)	60	63	59
Current use of a modern method of family planning (% of currently married women age 15-49)	59	61	57
Currently married women age 15-49 **not** exposed to family planning messages on television and radio, or in newspapers/magazines in 6 months before the survey	55	58	53
Maternal Health			
Maternity care			
Pregnant women who had 4+ ANC visits from a skilled provider[1] (%)	93	91	83
Births assisted by a skilled provider[1] (%)	96	97	92
Births delivered by Caesarean section (%)	68	62	52
Women giving birth who had a postnatal checkup from a skilled provider[1] within 2 days of delivery (%)	93	94	82
Child Health			
Children age 18-29 months fully immunized[2]	99	93	91
Infant mortality rate[3]	23	17	22
Nutrition			
Children under age 5 who are stunted (too short for age) (%)	12	19	21
Children 6-54 months who are overweight or obese (%)	22	15	15
Ever-married women age 15-49 who are overweight or obese (%)	86	87	85
Ever-married women 15-49 months who have any anemia (%)	8	21	25
Gender			
Daughters age 0-19 who are expected to be circumcised (%)	23	31	56
Ever-married women age 15-49 who say female circumcision should continue (%)	32	38	58
Currently married women age 15-49 who usually participate in 3 personal and household decisions[4] (%)	70	68	59
Ever-married women age 15-49 who agree husband is justified in beating his wife (%)	15	14	36
Ever-married women age 15-49 who are currently employed (%)	15	16	16
Net attendance ratio[5] for secondary school age girls (%)	81	81	77

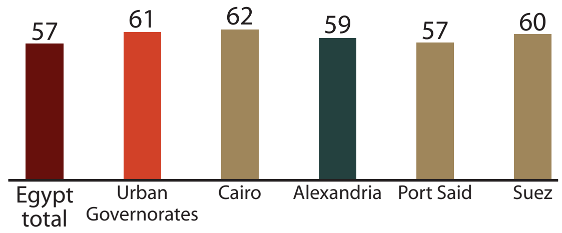

[1] Skilled provider includes doctor or nurse/midwife.
[2] A child is considered to be fully immunized if the child has received BCG, a measles vaccination, 3 DPT and 3 polio vaccinations.
[3] Deaths per 1,000 live births in 10 years before survey for Alexandria and Urban Governorates and in 5 years before survey for Egypt total.
[4] 3 decisions include women's own health care, making major household purchases, and visits to her family and friends.
[5] Net attendance ratio is the percentage of the secondary-school age (12-17) population that is attending secondary school.

Urban Governorates:
Key Indicators from the 2014 EDHS

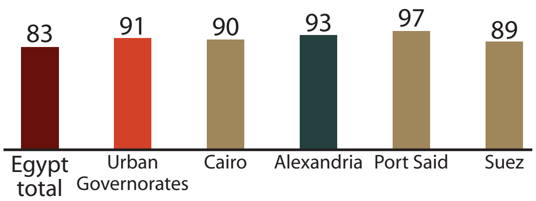

Total Fertility Rate
Average number of live births per woman age 15-49

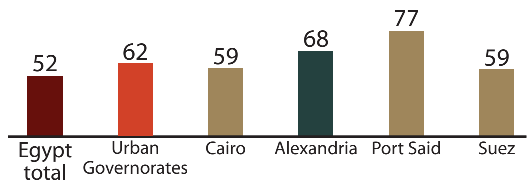

Use of Modern Methods of Family Planning
Percent of currently married women using a modern method of contraception

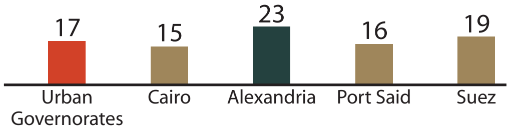

Antenatal Care: 4+ visits
Among women with a live birth in the 5 five years before the survey, percent with 4+ ANC visits for their last live birth

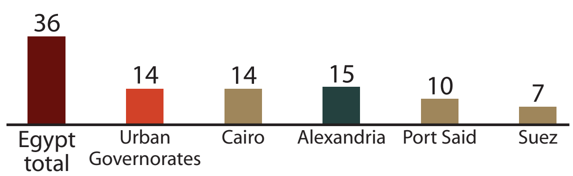

Delivery Care: Caesarean Section
Percentage of births in the 5 years before the survey delivered by Caesarean section

Infant Mortality
Deaths in the first year after birth per1,000 live births in the 10 years before the survey

Attitudes toward Wife Beating
Percent of ever-married women age 15-49 who agree that a husband is justified in beating his wife for specific reasons

The 2014 Egypt Demographic and Health Survey (EDHS) was conducted on behalf of the Ministry of Health by El-Zanaty and Associates. The 2014 EDHS is part of The DHS Program which is funded by the United States Agency for International Development (USAID). USAID/Egypt was the main contributor of funding for survey. Support for the survey also was provided by UNICEF and UNFPA.

For additional information about the 2014 Egypt Demographic and Health Survey, please contact Ministry of Health, Magles El Shaab Street, Cairo, Egypt; telephone: 20-2-27948555; fax: 20-2-27924156

Behera

	Behera	Lower Egypt	Egypt total
Fertility and Family Planning			
Total fertility rate (number of births per woman)	3.5	3.4	3.5
Current use of *any* method of family planning (% of currently married women age 15-49)	66	64	59
Current use of a modern method of family planning (% of currently married women age 15-49)	66	62	57
Currently married women age 15-49 **not** exposed to family planning messages on television and radio, or in newspapers/magazines in 6 months before the survey	47	49	53
Maternal Health			
Maternity care			
Pregnant women who had 4+ ANC visits from a skilled provider[1] (%)	88	87	83
Births assisted by a skilled provider[1] (%)	93	95	92
Births delivered by Caesarean section (%)	56	60	52
Women giving birth who had a postnatal checkup from a skilled provider[1] within 2 days of delivery (%)	84	86	82
Child Health			
Children age 18-29 months fully immunized[2]	94	93	91
Infant mortality rate[3]	16	23	22
Nutrition			
Children under age 5 who are stunted (too short for age) (%)	10	18	21
Children 6-54 months who are overweight or obese (%)	13	17	15
Ever-married women age 15-49 who are overweight or obese (%)	84	87	85
Ever-married women 15-49 months who have any anemia (%)	16	22	25
Gender			
Daughters age 0-19 who are expected to be circumcised (%)	37	52	56
Ever-married women age 15-49 who say female circumcision should continue (%)	42	56	58
Currently married women age 15-49 who usually participate in 3 personal and household decisions[4] (%)	60	61	59
Ever-married women age 15-49 who agree husband is justified in beating his wife (%)	36	33	36
Ever-married women age 15-49 who are currently employed (%)	11	18	16
Net attendance ratio[5] for secondary school age girls (%)	66	81	77

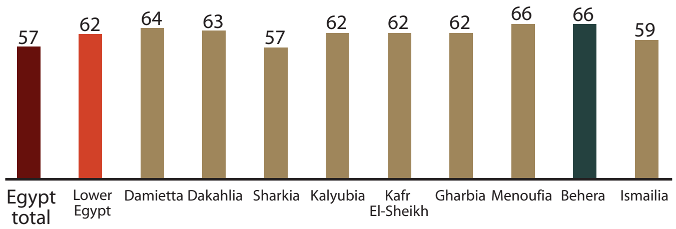

[1] Skilled provider includes doctor or nurse/midwife.
[2] A child is considered to be fully immunized if the child has received BCG, a measles vaccination, 3 DPT and 3 polio vaccinations.
[3] Deaths per 1,000 live births in 10 years before survey for Behera and for Lower Egypt and in 5 years before survey for Egypt total.
[4] 3 decisions include women's own health care, making major household purchases, and visits to her family and friends.
[5] Net attendance ratio is the percentage of the secondary-school age (12-17) population that is attending secondary school.

Lower Egypt:
Key Indicators from the 2014 EDHS

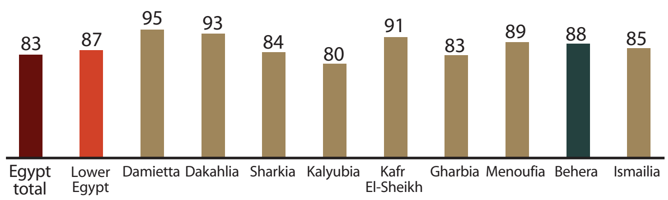

Total Fertility Rate
Average number of live births per woman age 15-49

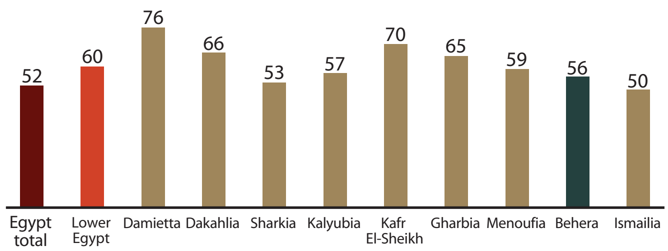

Use of Modern Methods of Family Planning
Percent of currently married women using a modern method of contraception

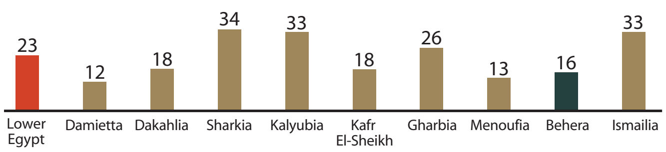

Antenatal Care: 4+ Visits
Among women with a live birth in the 5 years before the survey, percent with 4+ ANC visits for their last live birth

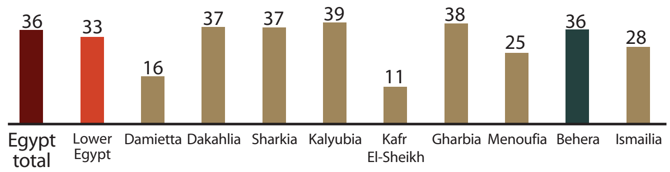

Delivery Care: Caesarean Section
Percentage of births in the 5 years before the survey delivered by Caesarean section

Infant Mortality
Deaths in the first year after birth per 1,000 live births in the 10 years before the survey

Attitudes toward Wife Beating
Percent of ever-married women age 15-49 who agree that a husband is justified in beating his wife for specific reasons

Children under age 5 who are stunted (too short for age) (%)	11	18	21
Children 6-54 months who are overweight or obese (%)	9	17	15
Ever-married women age 15-49 who are overweight or obese (%)	87	87	85
Ever-married women 15-49 months who have any anemia (%)	23	22	25
Gender			
Daughters age 0-19 who are expected to be circumcised (%)	69	52	56
Ever-married women age 15-49 who say female circumcision should continue (%)	66	56	58
Currently married women age 15-49 who usually participate in 3 personal and household decisions[4] (%)	59	61	59
Ever-married women age 15-49 who agree husband is justified in beating his wife (%)	39	33	36
Ever-married women age 15-49 who are currently employed (%)	20	18	16
Net attendance ratio[5] for secondary school age girls (%)	81	81	77

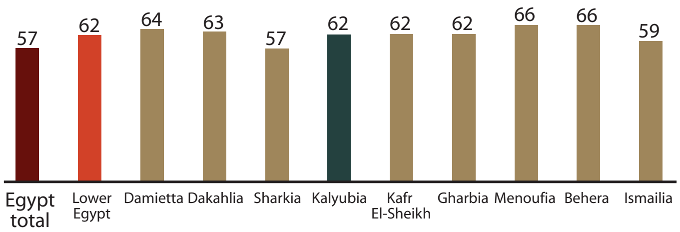

[1] Skilled provider includes doctor or nurse/midwife.
[2] A child is considered to be fully immunized if the child has received BCG, a measles vaccination, 3 DPT and 3 polio vaccinations.
[3] Deaths per 1,000 live births in 10 years before survey for Kalyubia and for Lower Egypt and in 5 years before survey for Egypt total.
[4] 3 decisions include women's own health care, making major household purchases, and visits to her family and friends.
[5] Net attendance ratio is the percentage of the secondary-school age (12-17) population that is attending secondary school.

Lower Egypt:
Key Indicators from the 2014 EDHS

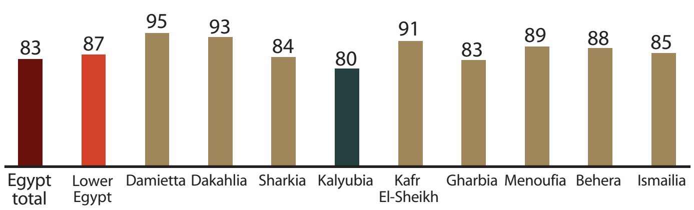

Total Fertility Rate
Average number of live births per woman age 15-49

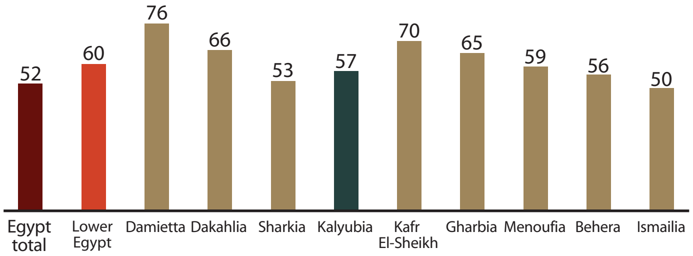

Use of Modern Methods of Family Planning
Percent of currently married women using a modern method of contraception

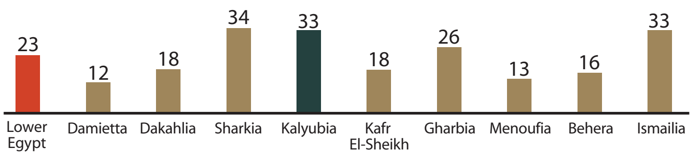

Antenatal Care: 4+ Visits
Among women with a live birth in the 5 years before the survey, percent with 4+ ANC visits for their last live birth

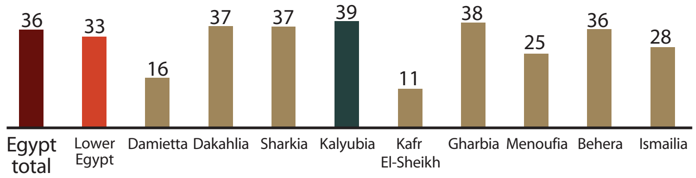

Delivery Care: Caesarean Section
Percentage of births in the 5 years before the survey delivered by Caesarean section

Infant Mortality
Deaths in the first year after birth per 1,000 live births in the 10 years before the survey

Attitudes toward Wife Beating
Percent of ever-married women age 15-49 who agree that a husband is justified in beating his wife for specific reasons

The 2014 Egypt Demographic and Health Survey (EDHS) was conducted on behalf of the Ministry of Health by El-Zanaty and Associates. The 2014 EDHS is part of The DHS Program which is funded by the United States Agency for International Development (USAID). USAID/Egypt was the main contributor of funding for survey. Support for the survey also was provided by UNICEF and UNFPA.

GIZA

	Giza	Upper Egypt	Egypt total
Fertility and Family Planning			
Total fertility rate (number of births per woman)	3.3	3.8	3.5
Current use of *any* method of family planning (% of currently married women age 15-49)	64	50	59
Current use of a modern method of family planning (% of currently married women age 15-49)	62	49	57
Currently married women age 15-49 **not** exposed to family planning messages on television and radio, or in newspapers/magazines in 6 months before the survey	77	57	53
Maternal Health			
Maternity care			
Pregnant women who had 4+ ANC visits from a skilled provider[1] (%)	80	76	83
Births assisted by a skilled provider[1] (%)	93	86	92
Births delivered by Caesarean section (%)	43	40	52
Women giving birth who had a postnatal checkup from a skilled provider[1] within 2 days of delivery (%)	90	74	82
Child Health			
Children age 18-29 months fully immunized[2]	86	88	91
Infant mortality rate[3]	20	32	22
Nutrition			
Children under age 5 who are stunted (too short for age) (%)	33	26	21
Children 6-54 months who are overweight or obese (%)	17	13	15
Ever-married women age 15-49 who are overweight or obese (%)	93	81	85
Ever-married women 15-49 months who have any anemia (%)	25	31	25
Gender			
Daughters age 0-19 who are expected to be circumcised (%)	54	69	56
Ever-married women age 15-49 who say female circumcision should continue (%)	58	68	58
Currently married women age 15-49 who usually participate in 3 personal and household decisions[4] (%)	73	52	59
Ever-married women age 15-49 who agree husband is justified in beating his wife (%)	19	47	36
Ever-married women age 15-49 who are currently employed (%)	11	13	16
Net attendance ratio[5] for secondary school age girls (%)	73	71	77

[1] Skilled provider includes doctor or nurse/midwife.
[2] A child is considered to be fully immunized if the child has received BCG, a measles vaccination, 3 DPT and 3 polio vaccinations.
[3] Deaths per 1,000 live births in 10 years before survey for Giza and for Upper Egypt and in 5 years before survey for Egypt total.
[4] 3 decisions include women's own health care, making major household purchases, and visits to her family and friends.
[5] Net attendance ratio is the percentage of the secondary-school age (12-17) population that is attending secondary school.

Upper Egypt:
Key Indicators from the 2014 EDHS

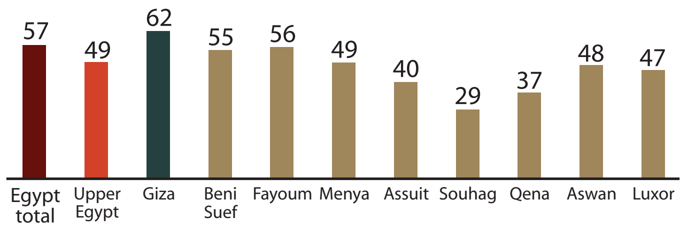

Total Fertility Rate

Average number of live births per woman age 15-49

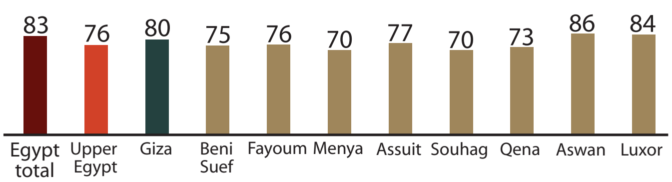

Use of Modern Methods of Family Planning

Percent of currently married women using a modern method of contraception

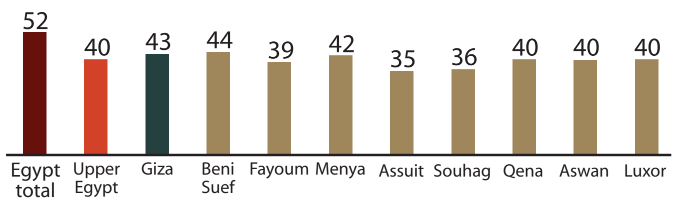

Antenatal Care: 4+ Visits

Among women with a live birth in the 5 years before the survey, percent with 4+ ANC visits for their last live birth

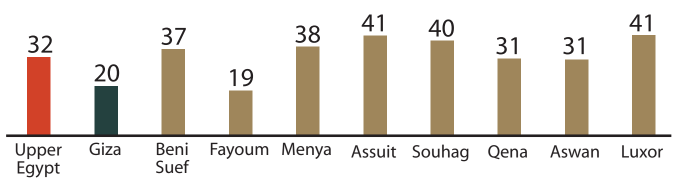

Delivery Care: Caesarean Section

Percentage of births in the 5 years before the survey delivered by Caesarean section

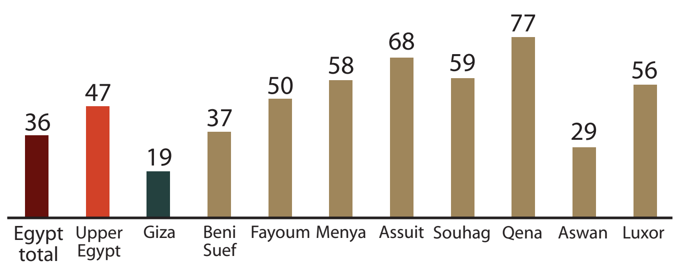

Infant Mortality

Deaths in the first year after birth per 1,000 live births in the 10 years before the survey

Attitudes toward Wife Beating

Percent of ever-married women age 15-49 who agree that a husband is justified in beating his wife for specific reasons
